Internet Address for Rates Page of Utility www.alamedapt.com/electricity/rates/index.html

Utility: Anaheim, City of - Public Utilities Department **Comments** 1) A 2000 kWh winter service is unreasonable in Anaheim. Winters are mild and residents use gas heat (not electric). 2) Only customers whose demand is higher than 500 kw can "select" our time of use rate. That is the only rate with seasonal changes in rates. The service requirements in your example are not representative.
